

# **CEEPCO Contracting - A Quality Government Contractor**

A consulting firm servicing the construction industry, CEEPCO Contracting leverages its expert staff of engineers, specialized construction workers, and environmental scientists to honor the needs of every client. In fact, the firm has partnered with federal organizations, such as the United States Department of Housing and Urban Development (HUD) and the United States Environmental Protection Agency (EPA) in their efforts to carry out initiatives in line with their federal mandates. For example, CEEPCO Contracting participated in the completion of HUD's new headquarters in Washington, DC, by rendering technical services related to concrete beam repairs. Besides its service to government organizations, CEEPCO Contracting has worked with not-for-profit groups that help people throughout the world. These organizations include the likes of Doctors Without Borders and the United Nations Development Program. A provider active in its wider professional community, CEEPCO affiliates with several industry groups, including the National Society of Professional Engineers and the National Association of Government Contractors. Moreover, CEEPCO holds licensed designations, such as the Leadership in Energy and Environmental Design (LEED) accreditation and a District of Columbia Professional Engineer license.
